

Palm Computing Platform

Installation

Donkie Kung is designed for the Palm Computing Platform. **"dkungprc"** should be installed into your handheld device using the instructions provided by the manufacturer. The appropriate display mode (black and white, grayscale or color) will be used when the application is started.

How to Play

Start Donkie Kung by tapping on the application icon in the application launcher. After a short while, you will be presented with the main Donkie Kung screen in which you may select the type of game you wish to play, or setup any configuration options.

There are two types of game play available, game A and B – your choice depends solely on your confidence and skill

level. Game A is for beginners, where Game B requires more skill and co-ordination. You can select the game type by tapping on the **"Game A"** or **"Game B"** buttons, or by using a menu command.

Using the hard keys or the stylus, you must move mario through the industrial landscape avoiding tumbling barrels and moving steel bars to grab keys that hold the platform Donkie Kung is standing on and save the captured girl. You may configure the key and sound volume on the configuration screen. You get to this by selecting the menu item **"Config"** in the **"Game"**

menu. Consult your handheld device manual for instructions of selecting a menu item. When a game is active, you may tap the speaker icon at the bottom left of the screen to get to the configuration screen. It is possible to pause the current game in progress by tapping the paw icon.

Registration

Donkie Kung is shareware, the demonstration version does not allow player to generate high score codes or the ability to save the captured girl more than once. To access these features, a device identification number is required to generate a unique unlocking registration datafile.

You can get to the registration screen by selecting the **"Register"** menu item in the **"Game"** menu.

To be included in the global high score table (located at <http://www.ardiri.com/>), send an email to aaron@ardiri.com with the information shown in the "Register Your Score" dialog. This will only appear if you beat the 'Internal' high score for each game type, or if you request it using the menu option under the **"Score"** menu on the main page.
